

Letter to concordanceout.eu 11 May 2018

Dear Editor

Thank you for the wonderful cartoons. Brexit was our Battle for Britain, and John Hart's excellent illustrations spell out our problems well. Where is our 21st Century Cromwell? Who is our Churchill? Where are our few?

Will EU open borders result in there being no need for Islamic crusades in a reverse order as the Islamic extremists amongst the immigrants are here and growing

Will the Americans come to our aid on technical issues over Brexit, e.g. re-authorise CAA authority after Brexit? Should we expect it while we continue to insult their elected President?

Have the French, Germans and Spanish finally got their revenge for the Armada, Waterloo, WWs1 & 2?

Sad it is to reflect that King John's efforts are defeated after nearly 1000 years by the enemy within,; most of whom are paid for and elected by the people they promise to represent and serve, and many are on the EU 'gravity train'.

It seems our best hope for salvation may now be former allies of the USSR, now or about to be members of the EU, when they realise they have traded one form of tyranny for another.

The EU is the epitome of the worst in government, seeking ever more money, more power and territory, and cunningly acquiring them all by stealth, deceit, and bribing their supporters with their own money. This is a "A Confidence Trick *par excellence, and without equal.*"

Who would have thought or believed that democracy would have been destroyed by those who allege that they practice it.

May our revolution, when it comes, be truly democratic

Thank you for this web site.

Jan [name and address supplied Ed]
