

## EDUCATION AND Educashun

Education is about the business of teaching and learning. The other is about the business of socialist and social engineering. as the Rev Peter Mullen rightly points out.

The PM is trying to ride both horses and needs to be decisive about whether she wants EDUCATION AND TECHNICAL TEACHING as the UK requires or social engineering and mass attendances at universities as socialist require. Thus producing with an unhappy uneducated jobless population not able to undertake the skilled activities required in the 21 century.

Learning requires tenacity learnt through failure and hard work. I was brought up on the phrase now used by the Rev P Mullen:- ““Hear, read, mark, learn and inwardly digest,” Education demands the truth, principles and integrity. Just look at our Media and Politicians today? ED.
