

PERFIDIOUS ALBION 28 5 2018

Nearly everyone will probably have seen on American TV, YouTube or read somewhere about Tommy Robinson over the weekend and, hopefully, you have signed the [change.org](http://change.org) petition to have him released immediately from HMP Hull.

The huge popular disgust at the actions of HM Government, and disgust of the new boy with his D toys, was a most welcome reaction to TR's arrest and imprisonment. This has been hugely encouraging.

The large and voluble demonstration in Whitehall shows that the Government and the police have crossed the Rubicon, or in modern speech, have crossed a line which puts this ineffective and useless Government, and its police, at odds with its own electorate.

We received a letter that said, "Sometimes it is easy to sit alone, and feel alone, seething with anger and frustration at what is being done to this wonderful country. The "authorities" attempt to silence the media has backfired on them spectacularly. Even George Osborne's Evening Standard carried an article about the arrest. Could this be the catalyst that sparks the fight back we have all been waiting for?"

The question that people are asking is this: "Do we want a Muslim as Home Secretary and indeed one who has not yet learnt how this country has functioned over the centuries?"

If he behaves in such a tyrannous way and seeks to instil fear in the minds of the tolerant and respectful, both young and old alike, then absolutely not. This behaviour is just wholly unacceptable.

The Government governs because it is permitted to do so by consent. The Police "police" the country likewise by consent. Taxes are paid by consent. Is this idiotic futile and incompetent Government seeking to be reminded of this?

The Home Secretary should fall on his sword, and May, who appointed him, should go with him.

17.4 million of the electorate of this once democratic isle voted as patriots of a once proud sovereign UK to leave the EU and become an independent nation once again. We did not vote to become either a MAY-EU Vassal state nor an Islamic state. Yes Lady Warsi, there is fear in this nation of Islam and that fear is being stoked into re-action. The British Bull-Dog will growl again.

We were promised that, Leave or Remain, our decision would be acted upon. There was no halfway house. This supine ignorant and feeble non democratic Government must go.

We do not hate. We love as the bible says. We all seek toleration and respect as we show the same, whether as a humanist, agnostic or atheist. We expect that these value be shown to us, whether by this Government or by the immigrants who have been welcomed into this Isle. We shall seek to defy those who will take our freedoms away from us. It is they who are behaving with Gross Offensiveness.

We were right to vote OUT. We are right to protect our traditions of Free Speech. There are articles global wide it seems in antipathy to this Government and support of TR. Freedom of speech is the bedrock of Democracy. PC is a cancer that is killing the search for TRUTH. It is right to fight for freedom of speech and for the right to expose extremists of Islam for being a barbaric aspect of Islam. These exponents are not propagators of a religion of peace. They breach our laws and they must be policed but the Police seem intent in continuing their failures of Rotherham, Newcastle and elsewhere, yet persecuting the ambassadors of truth.
