

Dear All,

There were three now four routes always after Art 50 Notice they all needed to be underscored by determination erudition truth and no secrecy that was supported by believable publicity

- A. Negotiate on both sides with real intent
- B. EFTA with UK negotiated changes
- C. Walk WTO simpleton route with no successes on any level
- D. May vassal EU satellite state, fully in but May style OUT

Truth and publicity:-

These two have both been absent on UK side

The EU have ensured the domination of untruth with excellent publicity

A. NEGOTIATE

In concordanceOUT.eu there is a simple pamphlet called BREXIT FACTS and One called BREXIT EXIT. Any negotiations require from the beginning 2 firm UK approaches.

- i. The essential objectives which are immovable and inviolate must be clear plus the discussables on each side known and understood

But

The EU has never discussed with any flexibility due to its non-sovereign status in real politique. It is unable to negotiate. It has a concrete rule book that does not flex.

The EU cheated and failed itself and so the UK failed and fails

- ii. The breakdown concept and so a non deal commencement in 2016 of a real preparations plan (see leaflet) and immediate implementation of it hoping for a deal but expecting no dealinc a plan for both "In and out of EFTA "

UK failed and fails and is unbelievably not pragmatic and totally discredited and untruthful.

The Mogg ignores these clear points. The Redwood continues to maintain his life membership of the Nelsonian Club whose motto is " I see no problems"

B. EFTA.

Please see EUReferendum.com plus CIB BREXIT RESET Leaflet

Plus NOBO Conformity and Irish race horse ARTICLES on concordanceOUT.eu

EFTA supplied interim solutions to all issues.

This EFTA insurance policy is part of A as well as an object in itself but of course preferably only an interim stepping stone. Many pros & Some Political Con and Cons. Ignorant May ruled it out at the very beginning when slightly less ignorant than even now.

C. WTO

IF there are no negotiations or they have failed both of which is the case

And

There is no EFTA work done and so that too is too late as Treaty change is required

THEN

We are left with no plan and no option but to CRASH OUT WTO STYLE this is the only alternative

It is regrettable but the only dramatic disruptive solution

This is at least OUT of EU and with major suffering perhaps certainly for those who expect much for little in return . But so what? If treated as yet another war yet with less loss of life discomfort and pain then it is bearable for those who know the Truth and History.

Roger Wright-Morris.
