If Trump is prepared to withdraw his German forces to the U.K., we should get rid of the worst Prime Minister in our history, immediately abandon trade discussions with the EU and switch all our efforts to an American free trade deal.

If the "addled" [*editor disagrees if this is a reference to Mr C Booker*] Booker is to be believed, the last act of NATO should be the activation of article 5 of the NATO constitution, following the EU attempt to ban British planes from flying - as clear an act of war as it is possible to make in the modern era.

**Remoaniacs need to wake up. This isn't a negotiation. This is economic war and Trump wants to help us. Just get rid of May, install Boris and we will prevail over the sinister, lunatic forces of Brussels.**

I know they won't though. The Remoaniacs in the BBC, Parliament, the Labour Party and massive corporations loathe our country. They want us as serfs paying taxes to them and the European superstate, not citizens with a voice
