Subject: EU London HQ

Leader, Gerard Batten MEP, underlines the co-ordinated efforts at Westminster to betray Brexit. Former Attorney General - the man behind attempts in Westminster to derail Brexit - attended a meeting of Remainers at, of all places, the EU's London headquarters – which you and I pay for !

Others attendees included Blair's former spin doctor, Alistair Campbell; Tory and Lib Dems, and representatives of various 'Remain' groups, all doing their best to subvert the will of the people in the 2016 referendum.

Speaking from Strasbourg, Mr Batten said, " it defies belief Mr. Grieve claiming he is not trying to stop the UK leaving the EU. Hours after his latest attempts to derail Brexit negotiations, he just happened to be meeting with others committed to overturning the referendum result ".

Is this a re-run of 1975 when an unholy alliance of Tory, Labour and other MPs manoeuvred the House of Commons into taking us into the European Economic Community ? Now, 43 years later, are we in grave danger of this happening again ? History tends to repeat itself.

Equally worrying is EU involvement in this cabal. Allowing their London HQ to be used for the meeting puts EU Bureaucrats at the centre of interference with our democracy, proof of ' the enemy within ' working towards overturning the peoples vote, efforts highly organised throughout the establishment.

Subverting democracy is a dangerous game. Far from changing the public's mind, Project Fear and ' backroom wheeler-dealing ' only polarises opinion, making us even more determined to leave the corrupt and damaging EU.

It destroys trust by the public for our democratic system. MPs such as Chuka Umunna and Anna Soubry believe the creation of yet another pro-remain political party helps their cause.

They are badly mistaken. Outside the London bubble, millions of us are resolutely behind the referendum result."
